PROFESSIONAL SUMMARY

Senior Data & AI Leader with 8+ years of experience building predictive analytics, machine learning, and intelligent automation systems across credit risk and supply chain risk within large financial institutions and high-growth AI startups. Proven track record developing scalable data platforms, predictive models, and executive-facing analytics products, including enterprise self-service dashboards and decision systems used by executive leadership to monitor risk, performance, and strategic initiatives. Delivered multimillion-dollar cost avoidance, accelerated decision cycles, and improved conversion and operational efficiency through data-driven automation and predictive modeling. Expert in Python, SQL, and modern cloud data architectures, with hands-on experience developing production-grade data pipelines, ML workflows, and AI-powered applications. Advanced practitioner in GenAI and Agentic AI, designing custom agents and intelligent workflows using Snowflake Cortex AI, OpenAI, Gemini, and Copilot to automate analysis, augment decision-making, and unlock new enterprise capabilities. Bridges business strategy and technical execution, partnering with engineering, and product teams to deliver scalable, high-impact data and AI solutions.

EDUCATION

Georgia Institute of Technology, Atlanta, GA **Dec 2027**
Master of Science in Computational Data Analytics
Georgia Southern University, Statesboro, GA **Dec 2018**
Bachelor of Business Administration in Supply Chain Management & Marketing

SKILLS

Programming: Python(pandas, numpy, scikit-learn, tensorflow), SQL, R
AI & Machine Learning: Predictive Modeling, Agentic AI, LLM Applications, Snowflake Cortex AI, Copilot Studio, OpenAI Agent Builder, Gemini (Google Agent Developer Kit)
Data Engineering & Cloud: Palantir Foundry & AIP, Google Cloud Platform, Apache Spark, Kafka, Hadoop, ETL/ELT Pipelines, Data Modeling
Analytics & BI: Tableau, Power BI, Snowflake, Databricks, Alteryx, SAP ERP
Data Governance: Collibra, Data Quality, Governance Frameworks

PROFESSIONAL EXPERIENCE

Interos.AI, Remote Jun 2025-
Analytics & Insights Manager- Marketing & Demand Generation/ Customer Success

- Led the definition and adoption of core marketing and pre-sales metrics across sales and marketing, implementing a unified measurement framework that informed GTM strategy, ***optimized account prioritization, and contributed to a 25% increase in prospect-to-customer conversion and $3M+ in new enterprise opportunities.***
- ***Designed and deployed LLM-assisted analytics workflows using Snowflake Cortex, OpenAI Agent Builder, and Python to automate insights generation for sales and revenue teams***, enabling exploratory analysis, metric generation, hypothesis testing, and anomaly detection, increasing analytical throughput 3× while maintaining human-in-the-loop review for high-stakes decisions.
- ***Developed time-series forecasting models to predict account-level intent and emerging supply chain risks***, enabling data-driven targeting, campaign prioritization, and portfolio growth decisions for enterprise sales executives.
- Acted as strategic consultant to enterprise customers, ***identifying emerging supply chain risks and delivering actionable insights to Chief Procurement and Risk Officers at organizations including Walmart, Disney, Wells Fargo, and the U.S. Navy***.
- ***Produced data-driven thought leadership reports leveraging predictive modeling, economic analysis, and supply chain metrics to guide marketing and demand generation strategies***, earning coverage in CNBC and informing executive decision-making.

Bank of America, Charlotte, NC
Assistant Vice President, Sr. Data Analyst- Enterprise Credit Data Strategy & Governance *Sep 2022- Jun 2025*
Assistant Vice President, Sr. Data Analyst- Procurement Operations *Jun 2021- Aug 2022*
Officer, Global Procurement Management Analyst *Jun 2019- May 2021*

- Directed a team of junior analysts delivering enterprise-scale credit risk and performance analytics for multi-billion-dollar commercial portfolios, ***driving the design of standardized measurement frameworks, forecasting models, and executive dashboards that informed portfolio health, delinquency risk, and key strategic decisions.***
- ***Designed and deployed scalable data quality and validation frameworks across 10,000+ critical data elements***, building ETL pipelines and transformation workflows that ensured audit-ready data for regulatory reporting, model governance, and executive decision-making.
- Served as Product Owner for enterprise data quality platform modernization, ***leading the migration of legacy workflows to Pegasystems and AWS while aligning system architecture with enterprise data governance and regulatory compliance standards.***
- ***Contributed to development and validation of a patented neural SQL generation deep learning model (Patent #12517914)***, performing expert-level error analysis and rule alignment to ensure accuracy, reliability, and production readiness in regulated financial environments.
- ***Delivered $2.5M+ in recurring cost avoidance by leveraging predictive analytics and scenario modeling*** across credit analytics, procurement operations, and enterprise reporting workflows, advising

CERTIFICATIONS

- **Palantir Technologies** – American Tech Fellow-; Certified Foundry & AIP Developer
- **Google Cloud** – Data Engineering, Big Data & Machine Learning on GCP Certification; AI Agents Intensive Certifications
- **Databricks** – AI Agent Fundamentals
- **Correlation One** – Data Science for All Certification
- **IBM** – Implementing Predictive Analytics Techniques Certification
